

Synchronize Your Organization's User Data with CrossCountry's CrossConnect for

Transfer workers and relevant HCM data and activity between Coupa and Workday environments.

Overview

CrossConnect for Workday automates the synchronization of your organization's user data from Workday to Coupa. The connector has been developed on Workday's Studio technology and web service API's as a configurable integration ready to deploy and monitor within your Workday tenant.

Solution

Utilizing seamless API technology, this integration enables organizations to transfer workers and their relevant HCM data and activity between your Workday tenant and Coupa environment. This ensures alignment between your ERP and your procurement solution resulting in:

- Near real time user creation, modification, and inactivation
- Elimination of the overhead of maintaining multiple systems for user access
- Reduced need for reconciliations
- Minimal Coupa user configuration time

Key Highlights

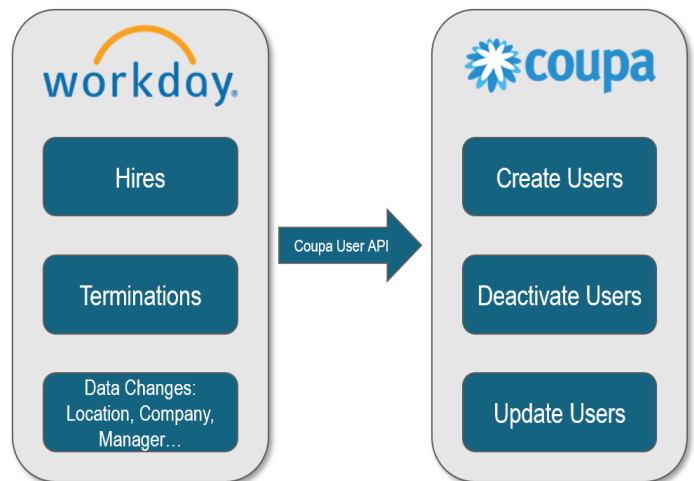

Transforms manual processes to significantly improve operational efficiencies related to user maintenance within Workday and Coupa

Automates approval flow updates within Coupa based on Worker modification in Workday

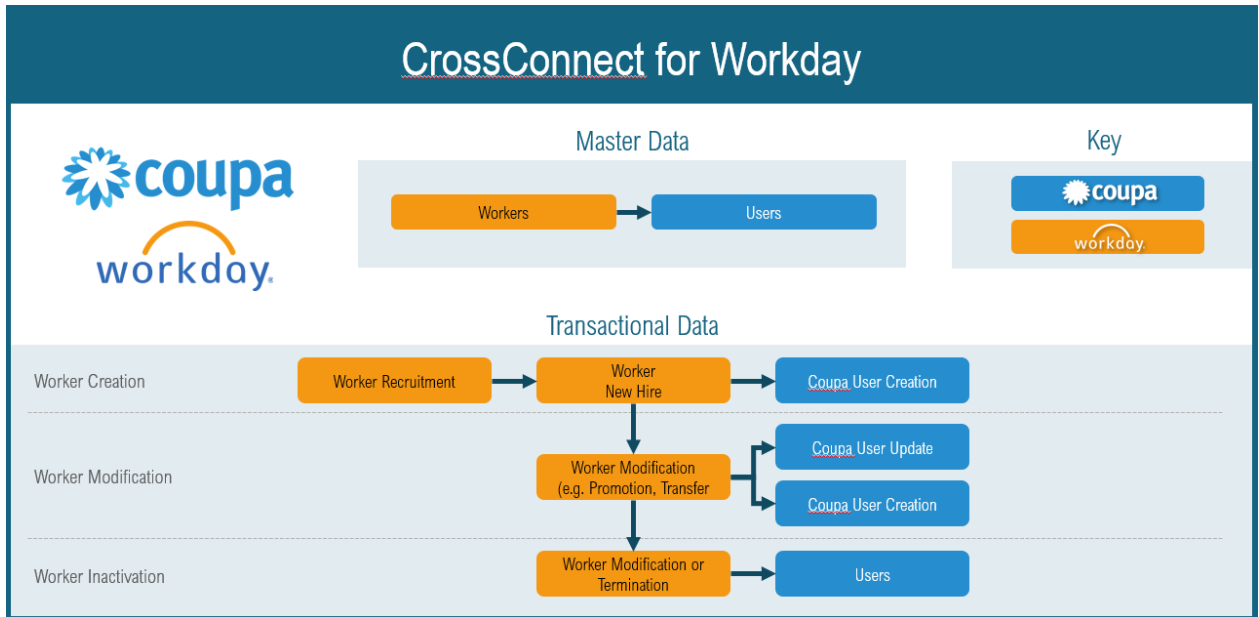

CrossConnect for Workday allows you to create, update, and inactivate users in real-time.

Key Features

CrossConnect for Workday eliminates manual work by automating Coupa user creation and maintenance from Workday.

The integration package is managed by CrossCountry, reducing workload and cost on internal IT infrastructure.

How to Get Started
